

I listen to K-Love on the way to work and while at work. It helps me stay in a up beat mood. If we loose K-Love it will not only effect me but I know many more people in my community. I get comments on how much people like the radio station I am listening to at work. K-Love is a radio station that provides clean listening and is safe for every age to listen too. The public needs to have a station to listen to that inspires people.
